Art Unit: 3729

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-7, 10 and 14-16 drawn to an apparatus comprising a bore and a tapered shell, classified in class 29, subclass 745.
- II. Claims 8 and 9, drawn to method of splicing a plurality of cable members, classified in class 29, subclass 869.
- III. Claims 11 -13, drawn to a method of installing an electrical insulating device, classified in class 29, subclass 825.

The inventions are distinct, each from the other because of the following reasons:

Group I is separate and distinct from Group II inasmuch as the apparatus as claimed does not have to be used to carry out the claimed method of splicing and moreover the method can be just as well carried out by hand. Group I is separate and distinct from Group III inasmuch as the apparatus of Group I is useful in many other instances besides being used to install recoverable electrical insulating devices. Moreover there is not any necessity of providing a contraction means in Group I as there is in Group III.

Group II is separate and distinct from Group III inasmuch as the inventions are unrelated to wit: Group II is drawn to method of Method of splicing... while Group III is drawn to method of installing an electrical insulating device.

Application/Control Number: 10/002,578

Art Unit: 3729

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for these Groups is divergent.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. J. Arbes whose telephone number is (703)308-1857. The examiner can normally be reached on M,T,R,F.
